

*Australian Internet Observatory –
Workshop Week 2*

Professor Richard O. Sinnott
Director, Melbourne eResearch Group
University of Melbourne
rsinnott@unimelb.edu.au

Workshop Goal

- Goal
 - To give a flavour of the kinds of data you will be dealing with
 - To explore what data *might be* available for assignment 2
 - This platform is to “augment” your own data collection systems!

Social Media Challenges

- Privacy
 - Real time tracking and monitoring of people
- Fake news
 - Never been easier to mislead people
- Big Data challenges
 - Volume, velocity, variety, veracity
 - More later

Social Media for Many Wannabes

Australian Data Observatory

APPS MOBILE TECH

Twitter is opening up its full tweet archive to academic researchers for free

To help researchers better study online discourse and platform trends

By Nick Statt | @nicksta

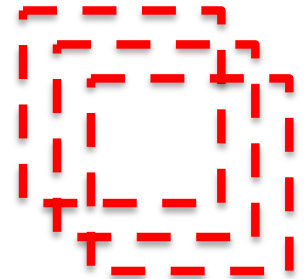

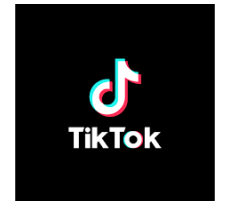

Listen to the podcast

Developers @XDevelopers

Starting February 9, we will no longer support free access to the Twitter API, both v2 and v1.1. A paid basic tier will be available instead 🧵

Australian Internet Observatory

AIO Capabilities

- Data Discovery
 - Data Aggregation
 - Topic Graphs
 - Term frequency
 - Text Analysis
 - Natural language querying

AIO Notes

Explore the dashboard

Find data sets/scenarios that may be useful

Get an API key

(one or more than one person per team can do this)

(data scenarios person/team)

The AIO system does NOT try to collect everything – you can/should do more, e.g. data from multiple Mastodon servers in Australia (e.g. mastodonservers.net) depending on your team requirements and scenarios

Many scenarios based on location – large Twitter corpus may be made available includes 100Gb+ of data with many posts including lat/longs

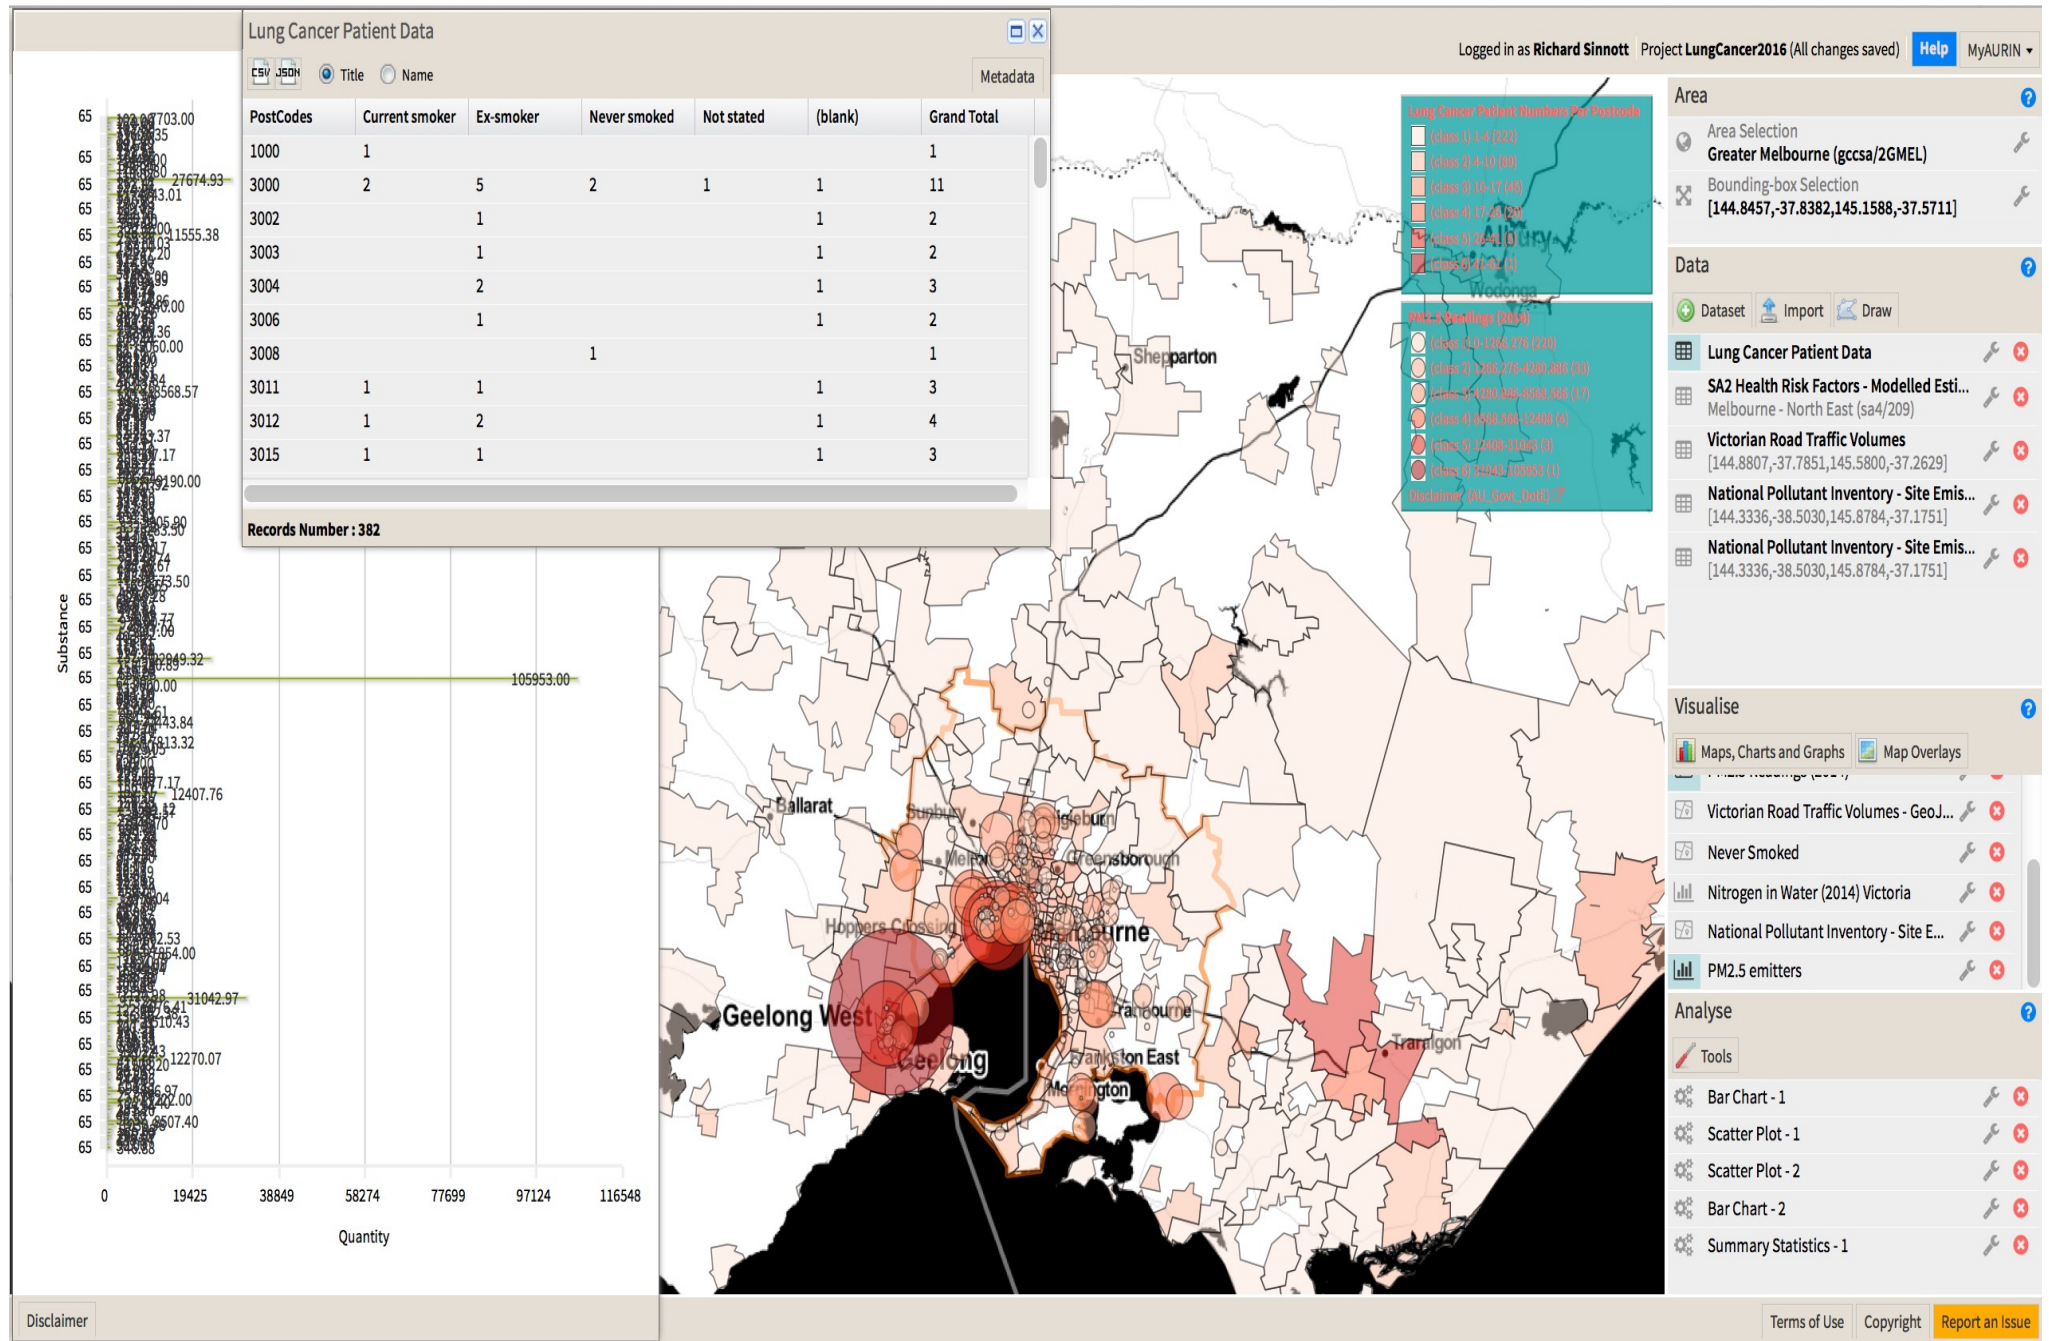

Demonstration of AIO

Official data sets: SUDO

- Australian Urban Research Infrastructure Network (AURIN) federally funded project
 - ~\$80m funding
 - www.aurin.org.au
 - University of Melbourne are lead agent
 - 12+ years of my life!
- Establishing an e-Infrastructure for Urban and Built Environment Researchers
 - Distributed, (completely!) heterogeneous datasets
 - Data interrogation services
 - Security (unit level data, health data, commercial data!)
 - Online analysis tools
 - Collaboration!!!

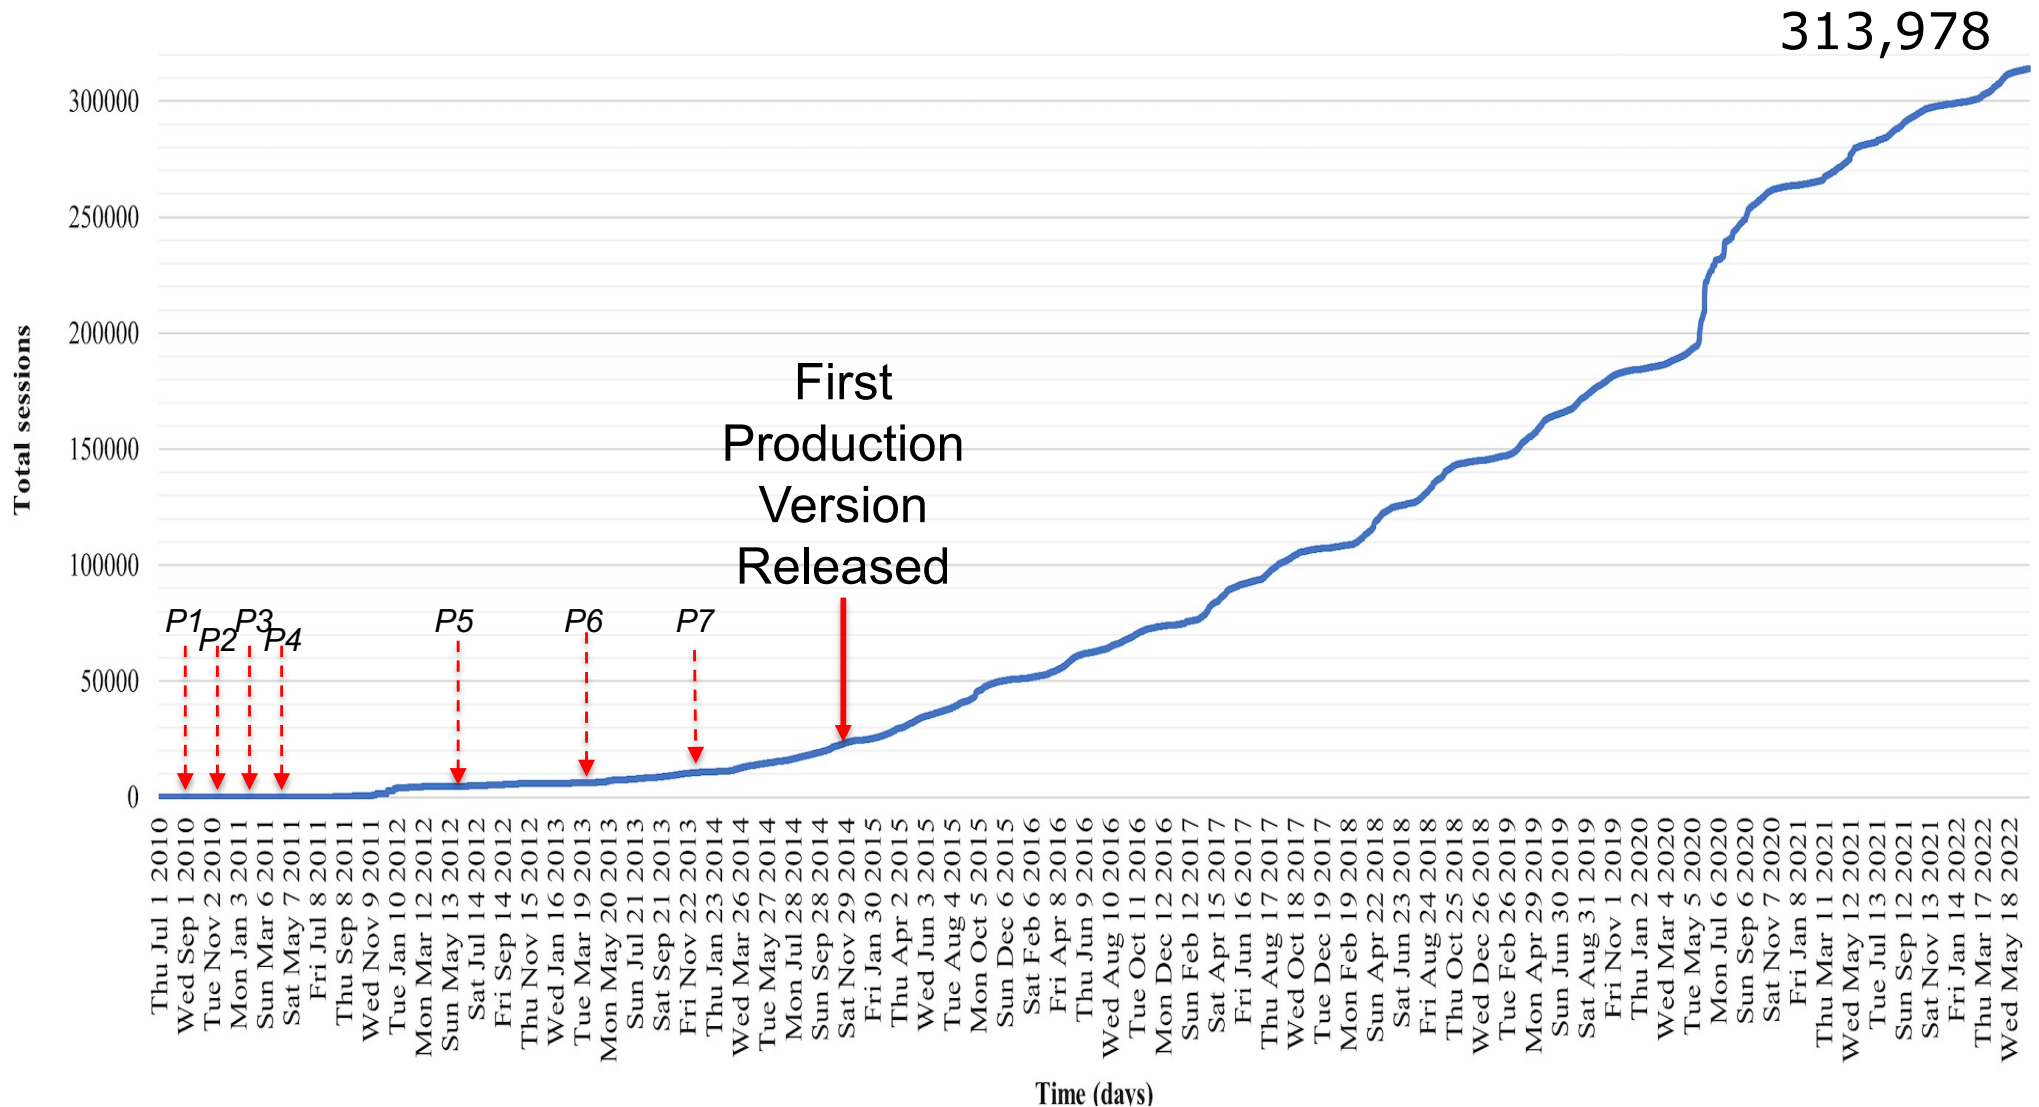

AURIN Example (in one slide!)

Utilisation of the Portal (#User Sessions from AAF)

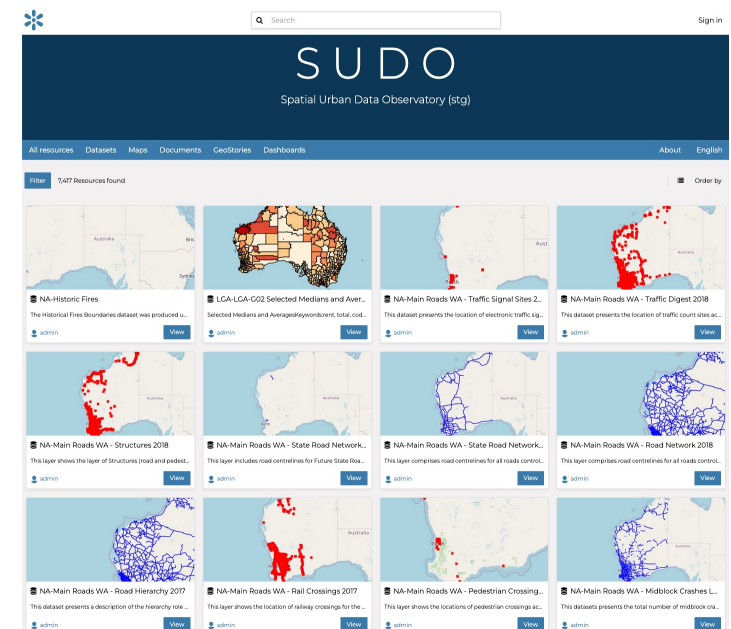

Total SP AURIN Portal Sessions over Time (days)

Period: Jul 01 2010 - Jul 04 2022

Spatial Urban Data Observatory

- Formally announced that the portal would be decommissioned in June 2022
 - Clear demand for such a capability
- SUDO rolled out to fill this demand
 - Core capabilities based on open-source portal code base
 - But
 - No licensed (to AURIN) data sets
 - No funding – all MeG pro bono
 - Hosted on the Melbourne Research Cloud
 - Free to access and use by all
 - <https://staging.unimelb-sudo.cloud.edu.au>

Demonstration of SUDO
